AS-Capstone

Status Report

What did I do this week:

1) Collaborated with group for potential methods to accomplish project goals.
2) Created goals based on priority to accomplish throughout project.
3) Researched other like projects to get an idea and create a blueprint for our project.
4) Accomplished version control and git branching.

Plans for upcoming week:

1) Consult group on prototype.
2) Outline project focuses and create a plan to accomplish main objectives.
3) Database design structure and table relationships.
4) Create overall look of web application.

Roadblocks:

1) Distance, and schedules.
2) Workload might be too ambitious need to consult group on what project should be focused on.
3) Miscommunications between members on project focuses.
